Tutorial

Check [Tutorial](#) tab to know how to solve.The included code stub will read an integer, n , from STDIN.

Without using any string methods, try to print the following:

123... n

Note that "..." represents the consecutive values in between.

Example $n = 5$

Print the string 12345.

Input FormatThe first line contains an integer n .**Constraints** $1 \leq n \leq 150$ **Output Format**Print the list of integers from 1 through n as a string, without spaces.**Sample Input 0**

3

Sample Output 0

123
